### About SERB

One of the most notable developments in the S&T sector in the XI Plan has been the setting up of the Science and Engineering Research Board (SERB) through an Act of Parliament, viz. the Science and Engineering Research Board Act, 2008. Promoting basic research in Science and Engineering and to provide financial assistance to persons engaged in such research, academic institutions, research and development laboratories, industrial concerns and other agencies for such research and for matters connected therewith or incidental thereto are the primary and distinctive mandate of the Board.

### About Workshop

Technology has not only changed the way teachers deliver their lessons and the way students learn; it has also made general education more accessible to millions of students through online classes and online resources. Today, most things are easy for students to learn, all thanks to the internet. While students have a barrier in traditional education, online classes will help them to learn something new and gain experience. Even boarding students can take advantage of this. E-learning is an

effective way for students to study. Artificial Intelligence is a major step forward in how computer system adapts, evolves and learns. It has widespread application in almost all industries and is considered to be a big technological shift, similar in scale to past events such as the industrial 4.0 revolution. This one week Workshop on Role of the Technology in Current E-Education System will give an opportunity to gain expertise in content drafting and delivery to the students, through hybrid program that covers fascinating and compelling topics related to the use of technology in current E-education system.
