Organized by:

POORNIMA
INSTITUTE OF ENGINEERING & TECHNOLOGY

Affiliated to RTU, Kota • Approved by AICTE & UGC under 2(f) • Accredited by NAAC and NBA

ABOUT THE INSTITUTION

Poornima Institute of Engineering & Technology, Jaipur (PIET) is a premier institution in engineering education, established in the academic year 2007, it is affiliated to Rajasthan Technical University, and approved by AICTE. PIET aims at providing world-class technical and scientific education that can develop a professional outlook in every walk of life and has been ranked 3rd in RTU-QIV ranking. Some of notable achievements are: Some key salient features are: • PIET has been 1st Institution to offer B. Tech CSE in Regional language under NEP 2020 • PIET is accredited by National Assessment and Accreditation Council (NAAC). • B. Tech in Computer Engineering is accredited by National Board of Accreditation (NBA) • PIET has been rated PLATINUM by AICTE- CII Survey for strong Industry Linked Technical Institutes • PIET is the only institute in Rajasthan to be funded by AICTE with a fund of Rs. 55 Lakh for establishing IDEA Lab. • PIET has established Neural Network & Deep Learning Lab under MODROB Scheme with granted in aid of Rs. 12.84314/• Also Received Research Grants for more than 50 Lakh in the last 3 years from agencies like TEQIP III, AICTE, NITTTR etc.

About the Department

The Department of Applied Science is the founding department of PIET, established in 2007 with the mission of imparting quality teaching and promoting implementation of practical aspects of Applied Science to build a solid foundation as part of the Engineering education. The department provides a strong footing to the students in the first year of engineering where students get acquainted with a wide range of basic science and technical subjects and get hands-on experience on various instruments. The PIET Library is fully computerized with KOHA-Library Management Software integrated with Bar-Code Technology and well maintained books and journals from all aspects of need.

ABOUT THE CONFERENCE

The present era is loaded with the "Information Revolution". Alvin Toffler in his famous book "Third Wave" correctly perceived that human civilization has witnessed three great revolutions "Agricultural Revolution" "Industrial Revolution" and "Information Revolution". It is due to development in Information and Communication Technologies (ICT) in which libraries have been assimilated at the electronic frontier to facilitate rapid transfer of information on a global scale.

Developments in computer storage and telecommunication approaches, online admittance to databases, electronic journals, electronic knowledge banks, direct document transfer, tele-text, etc proves to be revolutionary developments in the last two-three decades that have carried a great change in communication, storing and handling of information.

A wide variety of ethical problems with cyberspace and global networks will certainly generate a new challenge for society. In this age libraries are changing from traditional confined walls to virtual libraries. Concurrently, we have observed new ethical anxieties in ICT about the protection of privacy, protection of intellectual property, user responsibility, popping of the information, software piracy, cyber security and social media. These all have impacted the lack of ethics and moral values of the society and thus need to amalgamate human values with Information technology.

This international conference provides a platform to present ethical human values to preserve moral values and the concept of ICT and Library. It is focused on the ethical aspect of ICT using library based ethical issues like plagiarism, piracy, hacking of software which aim towards discussion about the role of ICT trends in holding human values and ethical practices.

CALL FOR PAPERS

Track 1: Artificial Intelligence and Block Chain Align with Human Values
- Aligning AI with Shared Human Values for Sustainable Software Development
- Opacity and Dark side of AI and ethical consideration
- AI for healthcare innovation and management
- The role of AI in the fourth Industrial Revolution (Industry 4.0)
- Machine learning, Cyber-physical Systems, Human-Robot Interaction
- Novel approaches to development of block chain applications
- Emerging block chain ecosystem analyses
- Privacy & Surveillance
- Bias in Decision Systems

Track 2: Emerging and Innovative Technologies in Libraries
- Cloud Computing and its application in Libraries
- Green technologies in Libraries
- e-Resource Access , Management & e-Learning
- Institutional Repositories, data Repositories and Metadata Standards
- Knowledge Discovery and Remote Access Tools & Services in Libraries
- Designing of Libraries as "Learning Commons."
- Challenges in Managing Modern Libraries/Digital Library

Track 3: Social Media and Innovative Library Practices
- Information Sharing Models/Consortia
- Personal Information Management and Digital Libraries
- Knowledge Management, Sharing and Transfer
- Integration of Social Networking Tools: Digital Media Commons
- Mobile Social Networking and Mobile web
- Web enabled Cloud Library System and Services
- Email and SMS integrated services
- Discovery and Remote Access Tools & Services in Libraries
- Analytics /Big Data management & Opportunities for Library Professional
- Recent Trends in Digital Library Services & Social media in digital services
- Digital Cultures and Digital Literacy
- Sustainability, Usability and accessibility aspects of digital libraries

Track 4: Human Values and Life Skills- Building Robust Society
- Human Values Challenges, Root Cause and Way Forward
