

About Progressive Education Society

Progressive Education Society is one of the leading educational institutions in Maharashtra. Late Shri Guruvarya Shankarraoji Kanitkar founded Progressive Education Society in 1934 with a great foresight. He was an inspiration to members who joined hands with him in implementing the idea of starting new era of education system in Pune. The remarkable two words "Progressive" & "Modern" were used by founder to demarcate the dreams and future road map of Progressive Education Society, Pune 05.

Progressive Education Society is the recipient of CSR Award conferred by MCCIA & IBN-Lokmat.

A remarkable and noteworthy progress has been made during the last 85 years of existence with more than 62 institutions being run under the aegis of P. E. Society under the guidance and dynamic leadership of Prof. Dr. Gajanan Ekbote, Chairman, Business Council, P. E. Society.

About Modern Institute of Business Management

Progressive Education Society's Modern Institute of Business Management came into existence in 2010. MIBM's vision is "We aspire to be recognized as a leading management institution dedicated to serving the world of business through professional, technological, social and intellectual contributions made by research oriented and committed teaching fraternity."

The purpose of education is to prepare young minds for meeting life's day to day challenges, to get employment, to make way for pure intellectual pursuits and be sensitive citizens contributing to the growth and development of the society.

MIBM aims to provide students with all the essential skills needed, to transform them into peak performers in the journey of lifelong excellence. MIBM ensures learning for students is constant source of fascination, discovery and delight. The Institute is committed to providing a strong foundation and building competencies to create business leaders.

About Theme :

In this modern era we all are facing globalized, and increasingly complex societies expecting diverse and the most demanding qualifications that needs insisting on combining competencies from various disciplines, thereby emphasis on founding preferential institutional frameworks for adaptive teaching-learning process.

The problem of synchronicity of progress and education can be address by multidisciplinary education. Multidisciplinary education seems to be based on behavioural science approach.

The Behavioural Science Approach is focused on the psychological and sociological processes (attitudes, motivations, and group dynamics) that influence employee performance. These relate to psychology, cognitive sciences, science, psychobiology, neural networks, social cognition, social psychology, semantic networks, ethology, and social neurosciences.

Behavioural science has entered the mainstream of public policy innovation, development, and implementation. National education policies have enabled a dramatic expansion of behavioural strategies to improve student outcomes. Traditional and Professional students are looking to earn a degree or credential or gain new skills and certifications. Multidisciplinary learning can also be achieved through cross-cultural exchanges between countries and faculties, universities, and staff using modern achievements in communication technology.

Future pedagogy can be taught as a course in integrative studies, or vice versa. This approach to future education is both multidisciplinary and interdisciplinary. We can put the pieces together by considering how different dimensions of human reality and nature are interactive and interpenetrating.

Objectives of the Conference

- To seek collaboration between academia, industry, and all stakeholders to share their perspectives and ideas on behavioural science management.
- To disseminate knowledge and provide insights into future education in India based on the National Education Policy.
- To elaborate, the main objectives of NEP- Multidisciplinary Education, and how it affects interdisciplinary education as the demanding societies and industry expect diverse competences from education,
- To study the application of the behavioral science approach to management to effectively implement national education policy

We invite renowned experts, experienced practitioners, research scholars, industrialists, academicians and students to share their research work on the following themes:

Track 1: Organizational Management

Role of Behavioral Science Management in organizing the Institutional Resources and setting up an effective organizational design in view of Implementation of National Education Policy and Multidisciplinary Education

Track 2: Personnel Management
