

One-week National Workshop on *koha* OSLS

Organized by
**Dept of Library and Information
Sciences, CUP Bathinda**

Central University of Punjab

Established in 2009 under an Act of Parliament, the Central University of Punjab has made significant strides in its 13-year journey. Accredited 'A+' grade by NAAC and ranked among the top universities in India, it focuses on instructional and research facilities across diverse disciplines. With an expansive 500-acre campus in Ghudda village, the university aims to foster innovation in teaching, learning, and research. Emphasizing e-governance through the Samarth Project, it seeks transparency and efficiency. The university offers PG and Ph.D. programs in 31 departments and 11 schools, emphasizing research, skill

development, and entrepreneurship. Committed to social causes, it encourages student participation in various activities. The institution has excelled in research projects and publications, showcasing a strong Faculty to Projects and Faculty to Publications Ratio. A multi-cultural mini-India, it boasts students and faculty from various states, receiving training from reputed universities/institutes in India and abroad. The Central University of Punjab continues to shape the academic landscape of India with its dedication to excellence and inclusivity.

The Department

The Department of Library and Information Sciences, established in 2019, is dedicated to cultivating expertise in the realm of library management and information sciences. Offering M. Lib. I. Sc and PhD programs, it fosters a dynamic learning environment where students can pursue their passion for librarianship and make significant contributions to the evolving world of information dissemination and organization.

About the Workshop

The Department of Library and Information Sciences at the Central University of Punjab, Bathinda, is delighted to announce a comprehensive one-week workshop on the "*Koha Open-Source Library System*." This workshop is designed to equip library professionals, students, and enthusiasts with the necessary skills to manage and maximize

the potential of the Koha ILS. Don't miss this opportunity to enhance your knowledge and contribute to the advancement of modern library management.

Aims of the Workshop

Library professionals and administration face a difficult challenge in managing Library operations. In addition to the fact that the cost of proprietary software for library automation exceeds the available budget, the dearth of qualified personnel in libraries presents an administrative obstacle. Due to the increasing popularity of Open-Source Software (OSS) and technological advancements, libraries are adopting software packages that meet their requirements and allow for customization. This workshop will introduce participants to the most popular open-source software for library automation and digitization.

Workshop Details:

- Duration: **4th August 2023 to 8th August 2023**
- Location: **Online**
