# WORKSHOP ON DATA TO PUBLICATION HARNESSING BIBLIOMETRIC ANALYSIS TOOLS

## OVERVIEW

In today's highly competitive research landscape, it has become imperative for researchers to assess the impact and visibility of their work. Bibliometric analysis tools offer a systematic and data-driven approach to evaluating research productivity, identifying influential publications, and understanding citation patterns. This workshop is designed to equip participants with the knowledge and skills necessary to leverage these tools effectively, ultimately empowering them in the research assessment process.

## WORKSHOP OBJECTIVES

1. Explore the foundations of bibliometric analysis and its significance in research evaluation.
2. Familiarize participants with various bibliometric analysis tools and their functionalities.
3. Understand the key bibliometric indicators, such as citation counts, h-index, and impact factors, and their interpretation.
4. Learn how to retrieve and preprocess bibliographic data from different databases and sources.
5. Gain hands-on experience in analyzing and visualizing bibliometric data using popular software tools.
6. Discover best practices for utilizing bibliometric analysis tools to identify research trends, collaborators, and potential research opportunities.
7. Understand the ethical considerations and limitations associated with bibliometric analysis.
